WORK EXPERIENCE

Frontend Developer

The Gaia Coin Foundation

06/2021 - Present

Greensboro, NC

Cryptocurrency start-up aiming to promote environmentalism through blockchain technology.

Achievements/Tasks

- Building, refactoring, and testing components for the frontend social app using **React**, **Redux**, **GraphQL**, **AWS Amplify** and **CSS3**.
- Incorporated components of the **Material-UI** and the **Stream-Chat-React** APIs.
- Creating newsletters in **Wordpress** using custom themes/templates to help increase NFT buying traffic for the company.
- Work with other interns on pair programming assignments using **version control** practices.
- Implementation of **Javascript** best practices including **ES6**, **Async/Await**, and **modularization**.

EDUCATION

Fullstack Development Certificate

Rutgers University

03/2020 - 09/2020

Jersey City, NJ

Courses

- 24-week immersive bootcamp that covered **HTML5**, **CSS3**, **JavaScript**, **jQuery**, **Express.js**, **React**, **Node.js**, **MongoDB**, **MySQL**, and **Git**.
- Computer Science concepts included **progressive web apps**, **agile methodology**, and **database theory**.

Bachelor's of Science in Exercise Physiology

Montclair State University

09/2016 - 05/2021

Montclair, NJ

TECHNICAL SKILLS

Frontend

HTML5, CSS3, SASS, SCSS, jQuery, React, Redux, Wordpress, Material-UI, Firebase, Local Storage, Bootstrap, Stream-Chat-React, AJAX

Backend

Node.js, Express.js, SQL, MongoDB, Mongoose, PHP, GraphQL, AWS Amplify, REST APIs

UI/Other

Git, Jira, Docker

PERSONAL PROJECTS

Pizza Demó (02/2021 - 03/2021)

- Fullstack e-commerce store built in **React**, **Redux**, **MongoDB**, **Bootstrap**, **Node.js**, and **Express.js**, and the Stripe API.
- Users can select pizzas based on quantity and size to add to the cart and checkout.
- Includes a **REST API**, responsive design, admin permissions, and CRUD functionality.
- Implementing the Stripe API allows for purchases to be made, test mode enabled.

Weather Or Not (03/2021 - 03/2021)

- Day planner built in **Javascript**, **SASS/SCSS**, **HTML5**, **CSS3**, **jQuery**, and **Flexbox**.
- Uses the Open Weather **API** to allow user to search for city and retrieve the city's weekly forecast.
- User's plans are saved to the browser via **local storage**.

CERTIFICATES

Modern PHP Web Development (01/2021)

Course on how to implement a fullstack web app using **MySQL** and **PHP**. The course taught how to implement a XAMPP server.

Advanced CSS and Sass: Flexbox, Grid, Animations and More! (03/2021)

Guidance on how to use advanced best practices using the **SASS** preprocessor for **CSS**. Also showed how to implement Flexbox workflow.

100 Algorithm Challenge (09/2021 - Present)

Algorithms and in-depth solutions that are most common for preparing for Frontend Development Interviews. Algorithms are in **Javascript** and **Typescript**
